

# SHIVAM SINGH

React.js / Next.js Frontend Developer | TypeScript, Tailwind CSS, Node.js, PostgreSQL, Supabase  
Mumbai, India | [shivamsinghsrs@gmail.com](mailto:shivamsinghsrs@gmail.com)  
[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

## SUMMARY

Frontend-focused Full-Stack Developer with 2+ years building production React + TypeScript applications on Supabase / PostgreSQL, end to end: responsive, data-dense UIs, Row-Level Security, RPC functions, and cron pipelines. Shipped three live products with real-time analytics, drag-and-drop workflows, bulk Excel imports, and PDF automation.

## TECHNICAL SKILLS

**Languages:** TypeScript, JavaScript (ES6+), SQL, HTML5, CSS3  
**Frontend:** React 18/19, React Router, Vite, Next.js, Tailwind CSS, Radix UI, Ant Design  
**State & Data:** Zustand, TanStack Query, REST APIs, Recharts, ApexCharts  
**Backend & Data:** Supabase (PostgreSQL, Row-Level Security, RPC functions, Auth, Storage), node-cron, Prisma  
**Docs & Import/Export:** TipTap, xlsx (Excel), jsPDF, react-pdf  
**Tooling:** Git, GitHub Actions, CI/CD, Vercel, Figma, Agile/Scrum; AI-assisted dev (Claude Code, Cursor, Copilot)

## EXPERIENCE

**Frontend Developer**  
*Rath Infotech*

July 2024 - Present  
Mumbai, India

- Built and shipped 3 production React + Supabase applications, owning each end to end from UI to PostgreSQL backend: a role-based project-management system, a client reporting portal, and a bulk-import CRM.
- Built **Spectra**, a four-role RBAC project-management system (Admin, Manager, Executive, Specialist) with @dnd-kit task boards, Google OAuth domain-restricted auth, and Zustand + TanStack Query state, consolidating 3 SaaS tools into one product (~\$15K/yr saved).
- Engineered Spectra's PostgreSQL backend on Supabase: RPC stored functions with multi-phase task-replacement logic and TAT validation, Row-Level Security across all tables, and node-cron jobs refreshing a shared daily task pool.
- Built GA4 and Search Console analytics with week-over-week comparison (LATERAL joins) and keyword-ranking tracking, surfaced through Recharts/ApexCharts dashboards and client-ready PDF reports (react-pdf), cutting manual reporting from **hours to minutes**.
- Delivered a bulk-import CRM handling **50K+ records** with smart-merge logic, field-level audit trails, and Excel (xlsx) import of **10K+ rows** with client-side validation and progress feedback.

## PROJECTS

**Spectra – Project Management System** (*React, React Router, Supabase*)

- Multi-role SPA with a TipTap activity editor, onboarding tours and keyword maps, plus RankSense, its SEO rank-tracking module: 50K+ keywords per run via the DataForSEO API, with deduplication that cut API credit use by about 40%.

**Client Reporting Portal** (*React, Supabase, ApexCharts, react-pdf*)

- Client-facing analytics dashboards with multi-region breakdowns and on-demand PDF export.

**AttenView – Industry Association CRM** (*React 19, TypeScript, Ant Design, Supabase*)

- CRM for a gifting industry association: 10K+ row Excel imports with batch processing and validation, smart-merge deduplication across 50K+ records, field-level audit trails, and upload history (sole developer, Aug–Sep 2025).

**Multi-tenant Catalogue SaaS** (*Laravel, Filament, React, TypeScript*)

- Multi-tenant SaaS fixes (route renaming, price gating, bulk approvals, upload-on-behalf) and the Event Editions feature: Diwali, Holi and Christmas themed storefronts with editions admin, seeding and data migration (Aug 2026).
